Team Member Name		V. Ashish Reddy

1. Abstract

The E-Commerce Product Catalogue project is a web-based shopping platform designed to provide users with a smooth and interactive shopping experience. The system allows customers to browse products, search items, apply filters, compare products, and manage wishlists efficiently. The project focuses on improving product navigation and enhancing user experience through a responsive and user-friendly interface.

The application includes modules such as product catalogue management, category navigation, search and sorting, wishlist handling, product comparison, and an admin panel for product management. The frontend ensures responsive design, while the backend manages product data and database operations securely. This project provides practical exposure to full-stack web development and modern UI engineering concepts.

2. Module Mapping

Module Name	Assigned Roll Number(s)	Signature
Backend, Database & Admin Panel	2520030248	
Frontend UI & Product Catalogue	2520030415	
Search, Filter & Sorting	2520030248	
Wishlist & Product Comparison	2520030415	

3. Module Details

Rishi Varma K is responsible for developing the backend functionalities of the project, including database connectivity, product data management, admin panel implementation, and server-side operations. The work also includes handling APIs, CRUD operations, and maintaining secure data flow between frontend and backend systems.

V. Ashish Reddy is responsible for designing and developing the frontend user interface and product
